

MANAGEMENT

Roger Heilos, President and Founder

Roger Heilos, founder of Oralflo Technologies and inventor of the Oralflo Pill Swallowing Cup, hails from a 30-year mechanical engineering background. He spent the majority of his career developing specialty products for the Ethicon Division of Johnson & Johnson. To his credit, he accumulated an impressive record of innovative contributions to their company over the course of 18 years - including surgical implants, heart stents, hysterectomy shunts, soft tissue reattachment clips, ligating clips, and many other products that have helped to revolutionize the healthcare industry.

Prior to this, he worked as a facility operations manager for Weis-Aug Corporation, where he oversaw aspects of the injection molding process as it pertains to electrical parts. He also worked as a division manager at Thermoplastics Process Inc. He is pleased to devote his life's work to creating products that serve a practical use in the field of medicine.

Heilos received his Associate's Degree in Mechanical Engineering from the County College of Morris in New Jersey and went on to pursue studies in engineering from Rutgers University. He is a member of the Society of Plastic Engineers and currently resides in Bridgewater, New Jersey.
